Handlers in Treated Area Within 24 Hours After Application

Unless in an enclosed cab as described in the specimen label, handlers performing the tasks described in the specimen label in the treated area within 24 hours after application must wear:

- Coveralls
- Chemical Resistant Gloves
- Chemical Resistant Footwear
- A respirator with either an organic-vapor-removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C) or canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G)

Respirator Requirements

When a respirator is required for use with this product, the following criteria must be met:

- Cartridges or canisters must be replaced daily or when odor or irritation from this product becomes apparent, whichever is sooner.
- Respirators must be fit-tested and fit-checked using a program that can format to OSHA's requirements (described in 29 CFR Part 1910.134)
- Respirator users must be trained using a program that conforms to OSHA's requirements (described in 29 CFR Part 1910.134).
- Respirator users must be examined by a qualified medical practitioner to ensure physical ability to safely wear the style of respirator to be worn.
